## NOSAWA & CO.,LTD.

### Company Description

Our "Farm to Table"

NOSAWA has acted as a trading company on the global stage, adapting to the changing times and innovating repeatedly. For over 150 years, we have served as a bridge between Japan and the world.

We are not merely a trading company engaged in the buying and selling of products.

Under the stance of a "Total Approach" that supports customers from all directions for the long term, we are a group of professionals who face each and every customer, continuing to run alongside them to create the next future.

We pay attention to what our customers seek in products and services, even to the smallest needs. We add value to each customer's requirements and send them to the market.

Our small, but agile teams work with a speed that is unmatched by others. We have a track record and experience in pioneering numerous firsts in Japan. Our strong network, built on trust, and the spirit passed down since our founding are NOSAWA's capabilities and our unique strengths.

NOSAWA's "Farm to Table" is about utilizing its organizational capabilities to sincerely and wholeheartedly connect customers' products with consumers. It's about providing satisfaction to customers and consumers alike. As the culmination of this effort, we aim to contribute to the development of each market and industry we serve.
