SMTB Leasing Co., Ltd.

Company Description

As a member of the Sumitomo Mitsui Trust Group, we have supported our customers' businesses through our stable funding capabilities and the financial expertise and networks we have cultivated over many years. In addition to the expertise we have accumulated in specialized fields such as real estate and shipping, we have built relationships with customers at the heart of society and industry through the Group's extensive business platform.

We have also launched a new growth strategy. Rather than simply providing leasing services, we aspire to be a "Future Co-Creation Partner" that engages sincerely with customers tackling social challenges, creates value together through the power of finance, and helps shape the future. Guided by this vision, we will support our customers' ambitions while achieving sustainable growth and enhancing corporate value.

We aim to create a virtuous cycle of growth together with our customers: when each employee takes pride in their work and works with energy and enthusiasm, the quality of service we provide improves; in turn, positive feedback from our customers inspires and motivates our employees even further.

As times and economic conditions continue to change, we will maintain a spirit of continuous challenge in order to remain a company of choice for our customers. All of us are committed to meeting their expectations and delivering value-added services that are useful, appreciated, and meaningful to them.
