Avinton Japan

Company Description

Avinton is a business and IT consulting company based in Japan. We are the digital transformation partners of blue-chip multinationals as well as local governments. We excel at designing and delivering Big Data and AI solutions. Our tailor-made data and AI pipelines can be integrated seamlessly with our clients' ways of working.

At Avinton, we guide and nurture the growth of highly talented exceptional engineers that can deliver elegant solutions to our customers using cutting-edge IT technologies.

We have a great responsibility towards our diverse team but also our society. As Avinton was founded with regard to SDGs, we have implemented sustainable processes and activities – ranging from a paperless office with a minimal environmental footprint, to automation and efficiency.
