

## Unsung Fields Corp.

---

### Company Description

The Power of AI,  
for all humanity.

Although the innovative potential of AI is immeasurable, its benefits are not spread evenly. Concentrated in economically and geographically advantaged metros as well as large corporations, there is a noticeable disparity between the haves and have nots. From Educational Institutions and Healthcare industries, to small to medium sized businesses in rural areas; there lies a barrier between them and new innovations.

We are committed to bridging the gap and building a future where everyone can use AI to maximize their potential.

#### Mission

Realize a society where everyone can exponentially stretch their potential using AI.

#### Vision

A society where every member can freely access AI.

#### Value

- Building regional datacentres housing AI Clouds.
- Streamline AI infrastructure using Tentorren SOC's
- Developing and popularizing conversational AI.

#### Business Activities

We provide the ultimate runtime environment for AI. Not just by operating and maintaining hardware, but also developing our own cloud-service dedicated for our HPC-servers.

#### Our Service

##### SERVICE 01

##### Data Center Development

End-to-end support for data center development, covering everything from design to operation. By leveraging advanced technologies for efficient design, facility construction, and reliable operations management, we help to optimize corporate IT infrastructure.

Additionally, we strengthen security measures and disaster preparedness to ensure a stable operational environment that drives business growth.

##### SERVICE 02

##### Data Center Maintenance/Operation

We offer comprehensive technical support for the maintenance and operation of data centers. With 24/7 monitoring, we ensure continuous stable operations.

Through regular maintenance and proactive measures, we optimize equipment performance, as well as reducing potential risks.

Furthermore, we provide solutions which support business growth, enabling the seamless evolution of IT infrastructure.

##### SERVICE 03

## Cloud Services

By leveraging cutting-edge HPC performance, we provide advanced computing resources for AI development, machine learning, and data analysis to improve development efficiency.

We are jointly developing an inference-oriented cloud service (TaaS) utilizing Tenstorrent Galaxy™ processors. Our cloud environments deliver efficient, scalable infrastructure while minimizing initial investments.

## Company Details

---

### Head Office

Japan

---

### Main Business

・ データセンター開発支援 ・ データセンター保守、運用 ・ データセンター向けクラウドサービス開発、運用

---

### President

潮田 和則

---
