

MABUCHI S&T INC.

Company Description

Mabuchi S&T Group connects light and electrons, value and value with "polish", and illuminates people's future.

Mabuchi S&T is a general trading company of materials and equipment used in optical and electronic fields, and has been working for about half a century as a total coordinator of optical and electronic device processing.

Our strength is not just the sale of materials and equipment, but also the unique technology, information, and forged know-how that we have accumulated over many years in the field of optical and electronic device processing.

In order to respond to the increasingly diverse needs of our customers, we continue to support our customers in various aspects of their business by making full use of our capabilities in "problem-solving support", "overseas transaction support", and "value-added creation support".
