

Parker TAIYO,LTD.

Company Description

Parker Taiyo Ltd. is a distinguished Japanese manufacturer that has stood at the forefront of the fluid power industry since its establishment in 1933. With nearly a century of expertise, the company has played a pivotal role in supporting the modernization and automation of industries across the globe. Headquartered in Higashiosaka, Japan, Taiyo has built an unshakeable reputation as a specialist in motion and control technologies.

The core of Parker Taiyo's business lies in its comprehensive range of hydraulic and pneumatic equipment. From high-precision cylinders to advanced pumps, valves, and electric actuators, Taiyo's products are the "muscles and brains" of industrial machinery. Their applications are vast, spanning automotive manufacturing, semiconductor production, heavy construction equipment, and maritime engineering. What sets Taiyo apart is its exceptional ability to deliver tailor-made solutions. While many competitors focus on mass-produced standards, Taiyo excels in engineering customized products designed to withstand extreme pressures, temperatures, and specific spatial constraints.

A landmark moment in the company's history occurred in 2012 when Taiyo joined the Parker Hannifin Group, a Fortune 250 global leader in motion and control technologies. This strategic integration transformed Taiyo into a global player with local expertise. By leveraging Parker Hannifin's extensive research and development resources and its worldwide distribution network, Taiyo has been able to introduce cutting-edge technologies to the Japanese market while exporting its high-quality "Made in Japan" engineering to international customers.

In today's rapidly evolving industrial landscape, Parker Taiyo is committed to sustainability and innovation. Recognizing the global shift toward green energy and factory digitalization, the company is investing heavily in "e-mobility" and energy-efficient systems. Their latest product lines include eco-friendly electric actuators and smart sensors that enable predictive maintenance, reducing downtime and energy waste for their clients. This forward-thinking approach ensures that Taiyo remains relevant in an era defined by Industry 4.0 and carbon neutrality.

The work culture at Parker Taiyo is characterized by a blend of traditional Japanese craftsmanship (Monozukuri) and modern global management practices. Employees are encouraged to be problem-solvers, working closely with clients to understand their operational challenges and providing technical insights that drive productivity. As a member of the Parker Group, Parker Taiyo offers its staff a stable professional environment with opportunities for global collaboration, while maintaining the close-knit, dedicated atmosphere of a specialized engineering firm. For anyone looking to understand the backbone of industrial automation, Taiyo Ltd. represents the perfect synergy of history, precision, and future-oriented technology.

Company Details

Head Office

Japan

Main Business

油圧・空気圧機器、油圧シリンダ、エアシリンダ、電動アクチュエータ、真空機器、物流搬送機器（オートメーションシステム）等の製造・販売

President

李 在熏

Established

1933年(昭和8年)7月1日

Capital

4億9000万円

Number of Employees

101 - 500

URL

<https://www.taiyo-ltd.co.jp/>

Offices

Main Office

Sunrise Building 12F

Bingo-machi 2-6-8, Osaka-shi Chuo-ku
Osaka, Japan, 5410051
