

## Dynasafe japan

### Company Description

Dynasafe is a global market leader specializing in the management and disposal of Unexploded Ordnance (UXO), Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNe) materials. Headquartered in Karlskoga, Sweden, the company has dedicated over 30 years to neutralizing the remnants of war and modern explosive threats to safeguard people, property, and the environment.

What sets Dynasafe apart in the defense and security industry is its unique ability to address the entire ordnance disposal value chain. The company operates through three specialized business units, ensuring a comprehensive approach to complex security challenges:

First, **Area Clearance** provides expert services for the survey, detection, and removal of UXO and landmines, both on land and in marine environments. This unit is vital for offshore energy projects, port expansions, and post-conflict redevelopment, where safety is the prerequisite for progress. Second, **Protection Systems** designs and manufactures world-class explosive containment chambers. These gas-tight vessels, such as the DynaSEALR series, allow first responders, police forces, and military units to safely contain and transport suspected bombs or hazardous devices in public spaces like airports and arenas. Third, **Demil Systems** focuses on the safe and environmentally friendly destruction of conventional and chemical munitions. By utilizing proprietary Off-Gas Treatment (OGT) technologies, Dynasafe's plants achieve near-total elimination of toxic emissions, meeting the world's most stringent environmental regulations.

Since its inception, with roots dating back to the early 1990s through entities like Dynasafe BACTEC, the company has successfully completed over 1,000 projects in more than 70 countries. Their track record includes high-stakes missions such as the destruction of chemical weapon stockpiles in various nations and providing security for major global events.

In 2023, the company reached a significant milestone when its CEO, Charles "Charlie" Diggs, acquired the group, reinforcing its commitment to long-term innovation and customer-centric service. Today, Dynasafe continues to evolve as a technology-driven organization with a workforce of approximately 400 dedicated specialists. Joining Dynasafe means becoming part of a mission-driven team where engineering excellence meets humanitarian impact. The company fosters a culture of safety, accountability, and continuous improvement, offering employees the opportunity to work on projects that have a tangible, positive effect on global security and environmental sustainability. For those seeking a career that combines high-level technical expertise with a profound sense of purpose, Dynasafe stands as a premier employer in the international defense sector.

### Company Details

#### Head Office

Sweden

#### Main Business

不発弾（UXO）および化学・生物・放射性物質・核（CBRNe）等の危険物処理ソリューションの提供。具体的には、地雷・不発弾の調査・撤去（陸上・海上）、兵器の解体（デミリタリゼーション）システムの設計・運用、防爆容器（コンテインメント・チャンバー）の製造、および有害ガス処理システムの提供。

#### President

Charles "Charlie" Diggs (CEO 兼 オーナー)

#### Established

1991年（グループの中核となるDynasafe BACTEC等の設立および事業統合による）

#### Capital

非公開（2023年にCEOのCharles Diggs氏が率いるGage ABにより完全買収されたプライベート企業）

#### Number of Employees

101 - 500
