JP Tokyo & Co.

Company Description

JP Tokyo started its journey in 2016 is a Japan based Boutique Management Consulting and IT Services firm having headquarters in Tokyo.
We grew as an organization capable of handling complicated projects with ever increasing competencies.
Today are a leading provider of comprehensive business consulting and IT product engineering services, specializing in digital transformation strategies and execution. With a strong emphasis on innovation and client satisfaction, JP Tokyo leverages its expertise to deliver cutting-edge solutions that drive business growth and efficiency.

■ **Services**
Management Consulting: JP Tokyo provides strategic advisory services to help businesses optimize their operations, improve performance, and achieve sustainable growth. Our management consultants bring deep industry knowledge and analytical skills to offer insights and solutions that drive business transformation.

Digital Transformation Strategy and Execution: JP Tokyo offers end-to-end digital transformation services, from strategic planning to implementation. This includes transforming business processes, enhancing customer experiences, and adopting new technologies to stay competitive in the digital age.

IT and Product Engineering: Our IT and product engineering services encompass a wide range of solutions, including software development, system integration, and IT infrastructure management. We utilize the latest technologies and methodologies to deliver robust and scalable products.

■ **Global Presence**
OffShore Development Center: Operating as an offshore development center, JP Tokyo India boasts a team of approximately 200 professionals. This team provides critical support in software development, quality assurance, and project management, ensuring seamless delivery of services.

Strategic Sales Offices: We have established strategic sales offices in Europe (Finland) and the United States to better serve our global clients. These offices enable us to maintain close relationships with our clients and provide localized support and services.
