Simco Japan,Inc.

Company Description

SIMCO JAPAN Inc. is a leading provider of static control solutions and the Japanese arm of Simco-Ion, the world's largest and most experienced manufacturer of static control equipment. Established in 1977 as a joint venture, the company has grown into a wholly-owned subsidiary of Illinois Tool Works Inc. (ITW), a Fortune 200 global multi-industrial manufacturing leader. This affiliation provides SIMCO JAPAN with robust financial stability and access to world-class technological innovations.

The core mission of SIMCO JAPAN is to address the various challenges caused by static electricity in industrial environments. Static electricity can lead to significant issues such as particle contamination, electrostatic discharge (ESD) damage to sensitive electronic components, material handling difficulties, and even fire hazards in hazardous locations. SIMCO JAPAN's extensive product portfolio—including ionizers, static meters, charging systems, and anti-static bars—is designed to neutralize these risks, thereby improving production yields and ensuring operational safety.

The company's competitive edge lies in its ability to combine global resources with localized expertise. Headquartered in Kobe, SIMCO JAPAN operates with a deep understanding of the high quality standards required by the Japanese market. They serve a vast array of sectors, including semiconductor manufacturing, flat-panel display production, electronics assembly, automotive parts, plastics, and pharmaceutical packaging.

Beyond hardware, SIMCO JAPAN is renowned for its technical consultancy. They don't just sell products; they provide comprehensive solutions by analyzing the specific electrostatic environments of their clients' production lines. By quantifying invisible static issues through precise measurement and diagnosis, they offer tailored recommendations that drive efficiency.

In alignment with ITW's business philosophy, SIMCO JAPAN focuses on "Customer-Back Innovation," developing products that solve real-world problems. As industries move toward greater automation and miniaturization, the demand for sophisticated static control becomes even more critical. SIMCO JAPAN continues to lead the way, leveraging its global network and commitment to excellence to support the next generation of industrial advancement. Their dedication to sustainability and quality ensures they remain a trusted partner for manufacturers striving for perfection in their processes.

Company Details

Head Office
Japan

Main Business
静電気除去装置（イオナイザ）、静電気測定器、静電気帯電装置、導電性製品の製造・販売・輸出入

President
森本 修司

Established
1977年1月12日

Capital
3,000万円

Number of Employees
101 - 500

URL
