Sysamic K.K.

Company Description

Sysamic K.K. is a premier, independent business consulting firm headquartered in Saitama, Japan, dedicated to driving innovation through the strategic integration of technology, design, and business transformation. Since its establishment in August 2016, Sysamic has carved out a unique niche in the Japanese market, serving as a vital bridge for international enterprises looking to establish a presence in Japan, as well as for domestic companies seeking to modernize their operations through digital transformation (DX).

At the core of Sysamic's service offering is its deep expertise in Microsoft Dynamics 365. As a trusted partner, the company specializes in deploying comprehensive cloud-based solutions, including Dynamics 365 Business Central (ERP) and Power Platform. Their approach goes beyond mere software installation; they provide holistic consulting that streamlines financial management, supply chain operations, and customer relationship management. By breaking down data silos, Sysamic enables its clients to capture institutional knowledge and make faster, more informed business decisions.

Beyond enterprise resource planning, Sysamic excels in the digital commerce and creative sectors. The firm offers end-to-end support for eCommerce development—leveraging platforms like Shopify—coupled with sophisticated digital marketing and brand identity design. Their impressive portfolio includes collaborations with high-end European fashion brands, footwear retailers, and luxury fragrance companies. This ability to combine technical rigor with aesthetic sensibility allows them to deliver high-performance websites that function as powerful lead generators and sales engines.

The organizational culture at Sysamic is defined by a commitment to transparency, professional growth, and a customer-first mindset. Under the leadership of CEO Daniel Trask, the company fosters an environment where knowledge sharing is prioritized and every project is measured by its clear return on investment (ROI). Despite being a lean team of 17 professionals, Sysamic operates with the flexibility and approachability of a boutique agency while maintaining the standards of a global consultancy.

Sysamic's mission, "Advancing excellence with our partners," reflects their philosophy of long-term value creation. They believe in solving immediate pain points while ensuring business continuity through reduced complexity and risk. For employees, Sysamic offers a modern, flexible workspace that encourages personal development and collaborative problem-solving. As businesses continue to navigate the complexities of the digital age, Sysamic K.K. stands as a reliable partner committed to empowering organizations to reach their full potential through insightful technology solutions and superior execution.
