

thingnario Japan K.K

Company Description

シングナリオ is the Japanese subsidiary of Taiwan-based thingnario, established in January 2024. With IoT and AI at its core, we provide smart software services for the energy industry through a SaaS model, focusing on solar and energy storage systems.

thingnario has over eight years of experience in the field, managing 5 GW of capacity and connecting 100,000+ IoT devices — making it Taiwan's only software company with over 1 billion energy data records.Building on this expertise, シングナリオ delivers localized solutions for the Japanese market, aiming to support energy transition through digital innovation and partnerships with local governments and businesses.
