JINWA INTERNATIONAL

Company Description

JINWA INTERNATIONAL delivers the latest real estate information and opportunities to clients around the world.

We have extensive experience serving not only individual clients residing in China, Hong Kong, Taiwan, the United States, Singapore, and other countries, but also corporate clients based in jurisdictions such as the British Virgin Islands (BVI) and Samoa.

Leveraging our global expertise and market knowledge, we provide tailored real estate solutions that meet each client's unique needs. Our portfolio includes condominiums, detached houses, investment retail units, and entire office buildings, among other property types.

In addition, we work closely with affiliated tax accountants, attorneys, and administrative scriveners, enabling us to provide comprehensive support throughout the entire process—from property acquisition to post-purchase management and consultation.

Our Services

Real Estate Sales and Brokerage

We provide brokerage services for the purchase, sale, and leasing of real estate properties throughout Japan, with a particular focus on the Tokyo metropolitan area, including Tokyo, Kanagawa, Saitama, and Chiba.

Whether you are seeking investment properties or a primary residence, our experienced team is ready to assist you.

Investment Properties

Real estate investment offers numerous benefits, including rental income, capital gains, tax advantages, and insurance-related benefits. However, the effectiveness of these benefits varies depending on the property.

We carefully select and introduce investment properties that align with each client's financial goals and investment strategy, helping them build and preserve their assets. We also provide detailed financial simulations, allowing clients to compare real estate investments with other investment products and make informed decisions.

Residential Properties

In addition to investment properties, JINWA INTERNATIONAL assists clients in finding their ideal homes.

Whether you are relocating for work, getting married, supporting a child's overseas education, or simply seeking a new lifestyle, we offer personalized recommendations based on your circumstances.

For clients with busy schedules or those residing far from the property location, we provide online property viewings to ensure a clear understanding of the property's features and surroundings.

We begin by discussing your preferences and requirements to identify the most suitable options.

Rental Services

We offer rental property services for a wide range of clients, from single occupants to families.

We also welcome inquiries from international residents, including students and foreign nationals seeking accommodation in Japan.

Property Management

We respond promptly to inquiries from both property owners and tenants.

In addition to serving domestic clients, we provide property management services for overseas investors who own real estate in Japan.

Our commitment extends beyond the purchase of a property, ensuring ongoing support and peace of mind for our clients.

Non-Life Insurance

As an authorized insurance agency, we are licensed to conclude insurance contracts on behalf of insurance companies and introduce a variety of insurance products to our clients.

We can recommend suitable insurance solutions, including fire insurance and other property-related coverage, tailored to each client's specific needs.
