

World Chemical Co., Ltd.

Company Description

World Chemical Co., Ltd. is a Japanese manufacturer specializing in fluid handling equipment. Established in 1971, the company designs, manufactures, and sells corrosion-resistant chemical pumps, oil skimmers, and self-priming filtration systems for a wide range of industries, including chemical processing, surface treatment, metalworking, water treatment, and environmental applications. Guided by its corporate philosophy of innovation, World Chemical continuously develops advanced technologies to provide reliable fluid transfer solutions. In addition to its nationwide sales network in Japan, the company has expanded its global presence with operations in Taiwan, the United States, and China.
