

UniCore Co., Ltd.

Company Description

Uni-Core Co., Ltd., headquartered in the Nishiokamoto area of Higashinada Ward, Kobe City, and operating an additional branch office in Ashiya City, Hyogo Prefecture, is a dynamic and rapidly growing enterprise specializing in international trade. Founded originally in November 2020 and officially incorporated in February 2022 under the leadership of Representative Director Koichi Taniguchi, the company has quickly established a strong footprint in the highly competitive global market. Backed by a capital investment of 10 million yen, Uni-Core has demonstrated remarkable financial performance, achieving an impressive sales revenue of 1.55 billion yen for the fiscal year ending in January 2025.

The company's core operations are distinctly divided into two main pillars: the export of used automobiles and comprehensive export business consulting. In its vehicle export division, Uni-Core leverages Japan's long-standing reputation for producing highly reliable, well-maintained used cars to meet the surging demand in international markets. The company boasts a diverse and expansive global trading network, with primary export destinations spanning across multiple continents, including the United Kingdom, Malaysia, Cambodia, Fiji, Barbados, East Timor, and Thailand. By deeply understanding the unique import regulations, cultural preferences, and market dynamics of each target country—particularly focusing on regions with a high demand for right-hand drive vehicles—Uni-Core ensures the seamless delivery of high-quality vehicles that consistently exceed the expectations of overseas buyers.

In addition to its direct trade operations, Uni-Core actively shares its robust industry expertise through its specialized export consulting services. Navigating the operational complexities of international logistics, customs clearance, and cross-border commercial transactions can be highly daunting for many businesses. Uni-Core mitigates these challenges by offering strategic guidance, practical insights, and tailored solutions to other companies looking to enter or efficiently expand their presence in the export sector.

Supported by strong, trusting partnerships with major regional and national financial institutions such as Sumitomo Mitsui Banking Corporation and Minato Bank, Uni-Core Co., Ltd. perfectly combines financial stability with agile business strategies. Through its dual approach of hands-on exporting and expert consulting, the company is poised for continued global expansion, consistently bridging the gap between exceptional Japanese automotive products and global consumers.
