

FREST Co.Ltd.

Company Description

FREST Co., Ltd. is a comprehensive real estate company specializing in income-generating properties. The company provides a wide range of real estate services, including brokerage, acquisition and resale, leasing, property management, and real estate consulting for various types of investment properties, such as apartment buildings, office buildings, condominium units, and hotels.

Leveraging its proprietary database of more than 2.5 million property owners, together with an extensive network of individual investors, corporations, financial institutions, and real estate funds, FREST delivers tailored solutions that meet the diverse needs of both property sellers and buyers. By combining in-depth market knowledge with extensive industry expertise, the company supports clients throughout the entire investment process, from property acquisition and transaction advisory to asset management and operational support, with the goal of maximizing profitability and long-term asset value.

In addition, FREST has established business operations in major cities across Japan as well as overseas, providing real estate investment opportunities to both domestic and international investors. By responding proactively to changes in the real estate market and identifying new investment opportunities, the company helps clients optimize their real estate portfolios and achieve sustainable asset growth. Through its one-stop service model covering acquisition, brokerage, management, and consulting, FREST continues to create added value in the income property market while building long-term relationships based on trust and professional expertise.
