

ZEROVA

Company Description

ZEROVA Technologies is a global manufacturer of EV charging equipment and supplies. We offer a range of charging applications, from compact AC chargers for homes, to ultra-fast DC charging stations for businesses, as well as large-screen chargers with media display functions and scalable hubs for EV charging infrastructure.

Founded in 2010 as the Research & Development division of various global EV companies under Phihong Technology, which was established in 1972. As a publicly listed Taiwanese company, it has been dedicated to power supply products for over 50 years and is recognized as one of the top ten power supply providers worldwide. ZEROVA officially became a standalone company in 2022 specializing in EV total charging solutions and infrastructure consulting services.

Today, with our strong technological background, ZEROVA has installed more than 100,000 charging ports worldwide and serves customers such as global automakers and energy companies in Europe, America, and Asia.
