

Hyperion Materials & Technologies

Company Description

We are a global leader in advanced materials with decades of experience developing and manufacturing tungsten carbide powders, cemented carbide, synthetic diamond, and cubic boron nitride products.

Making Hard Materials that Make You Better

We are more than 2,000 people dedicated to creating solutions for your hard and super-hard material needs through partnership, innovation, and invention. Our unique cemented carbide, diamond, and cubic boron nitride (CBN) materials are the base for nearly 50,000 products in our portfolio.

Our Expertise

Our extensive knowledge about hard and super-hard materials gained through more than seven decades of experience and total control of our vertically integrated supply chain give us the unique ability to partner with our customers in the development of effective solutions specific for each need. This expertise includes carbide recycling and other sustainability measures.

Our Legacy of Innovation

Hyperion Materials & Technologies, Inc. is born out of GE, Diamond Innovations, and Sandvik Hard Materials. Research and development is our foundation, and partnership with our customers to create innovative technologies and material solutions are the building blocks for our continued growth.

Company Details

Head Office

United States

Main Business

タングステンカーバイド粉末、超硬合金（セメンテッドカーバイド）、人工ダイヤモンド、立方晶窒化ホウ素（CBN）製品の開発・製造

Offices

Main Office

6th floor, Wise Next Shin Yokohama 2-5-14, Yokohama-shi Kohoku-ku
Kanagawa, Japan, 2220033
