

ROE Visual Co., Ltd.

Company Description

★Would you like to move audiences in Japan with stunning visuals?

<https://www.roevisual.com/en/>

ROE Visual is a manufacturer delivering world-class LED displays to high-end clients across the globe. We utilize carefully selected, premium components and possess proprietary, cutting-edge technology that competitors cannot replicate. We hold a global market share of over 40%—and over 50% in Japan—for LED displays used in applications such as concert stage backdrops.

While our company name may not always be in the public spotlight, we are a globally renowned LED display manufacturer known to industry insiders. We are the choice of high-end clients—including famous artists and concert organizers, major theme parks, leading automotive companies, and other prominent corporations—who demand high-spec visuals and superior color reproduction, rather than those who are satisfied with "just getting an image on screen."

Our headquarters and factory are located in Shenzhen, China, with overseas sales offices (subsidiaries) in the USA, the EU (Netherlands, Germany), the UK, the UAE, Australia, and elsewhere. ROE Visual Japan is one of these sales subsidiaries. We import products from the Shenzhen factory and sell them to Japanese customers either directly or through distributors. Our consolidated annual sales are approximately 40 billion yen.

The average age of employees across the entire ROE group is a youthful 32, and ROE Visual Japan is also a vibrant company with an average age of 39.

We look forward to receiving your application.

Thank you.
