

ArchiVillage

Archi Village Inc.

Company Description

Archi Village was established to reduce selling, general and administrative (SG&A) costs and expand market opportunities within the building materials industry.

Due to its complex industry structure, the building materials sector faces a wide range of challenges, with the slow pace of digital transformation being one of the most significant.

To address this issue, we have developed an industry-specific order management platform designed to streamline purchasing and sales processes, improve operational efficiency, and drive the digital transformation of the entire industry.
