

Intersurgical Ltd,

Company Description

We are a medical device company specializing in respiratory care, designing, developing, manufacturing and supplying a wide range of products that support healthcare professionals and patients. Founded in the UK in 1982, we have continuously focused on innovation and product development in the respiratory care field. Today, our key areas of expertise include airway management, anaesthesia, critical care, and oxygen and aerosol therapy, with a broad portfolio of medical devices and related products used in healthcare settings.

Our product portfolio includes airway management products, breathing systems, anaesthesia products, critical care and ventilation products, as well as oxygen and aerosol therapy products. These solutions are used across a variety of healthcare environments, including hospitals, intensive care units and emergency care settings. We maintain an integrated approach covering product design and development, manufacturing, quality management and supply, enabling us to respond effectively to the evolving needs of healthcare professionals.

Today, we operate globally through an international manufacturing and sales network, providing high-quality respiratory care products and solutions to healthcare institutions and professionals around the world. In Japan, we provide respiratory care products and solutions to the Japanese healthcare market.
