## RUNSUN CLOUD AI Co., Ltd.

---

### Company Description

#### WHO WE ARE

RUNSUN CLOUD AI leads Runsun Cloud's business in Japan.

Founded in Singapore in 2023, Runsun Cloud provides high-performance GPU cloud infrastructure for AI, machine learning, HPC and large-scale data analytics. Our data center footprint spans Japan, Singapore and the United States, giving customers access to advanced NVIDIA GPUs, including the H100, H200 and B200.

#### OUR MISSION

We make advanced computing resources more accessible, scalable and efficient, helping companies, researchers and developers move ambitious AI projects forward.

Our infrastructure supports compute-intensive applications across generative AI, new materials, healthcare, genetic research, autonomous driving, financial analysis, gaming and graphics rendering.

In Japan, we operate next-generation data center infrastructure powered by renewable energy. We aim to deliver the performance, reliability and security required for demanding AI workloads while supporting a more sustainable approach to computing.

#### WHAT WE DO

- GPU cloud services for AI and HPC
- Cloud infrastructure design, deployment and operations
- Data center design, operations and maintenance
- Cloud migration and systems integration
- AI, data analytics and automation solutions
- Technical assistance and customer support

Join us in building the secure, sustainable infrastructure behind the next generation of AI.

### Company Details

---

#### Head Office

Japan

---

#### Main Business

AI・HPC向けGPUクラウドサービスおよびデータセンターインフラの設計・構築・運用

---
