

ALTECO co., ltd.

Company Description

ALTECO INC. is a highly specialized and well-established manufacturer of chemical adhesives, headquartered in Ibaraki City, Osaka Prefecture, Japan. Officially incorporated on July 1, 1969, the company has spent over half a century dedicating itself to the research, development, manufacturing, sales, and global export of a wide variety of high-quality adhesive products. With a capitalization of 90 million JPY and a dedicated workforce of 45 employees, the company operates under the steadfast leadership of President Reo Tanaka.

At the core of ALTECO's business operations is a comprehensive lineup of advanced chemical products. The company is particularly renowned for its industrial cyanoacrylate adhesives, commonly known as super glues, which deliver exceptionally fast and strong bonding solutions. In addition to these flagship products, ALTECO manufactures and supplies epoxy resin adhesives, anaerobic adhesives, and UV-curable resin adhesives. This diverse product portfolio ensures that they can meet the strict and highly specific demands of numerous industries, including automotive manufacturing, electronics, precision machinery, construction, and civil engineering. Furthermore, ALTECO does not only cater to industrial professionals; they also provide highly reliable consumer-grade products designed for everyday DIY projects and hobbyists, demonstrating the versatility and accessibility of their technological innovations.

A significant competitive advantage for ALTECO lies in its fully integrated operational structure, which encompasses everything from fundamental research to final production. The company's primary manufacturing and R&D hub is located in Konan City, Shiga Prefecture. In this state-of-the-art facility, experienced researchers and engineers work tirelessly to pioneer next-generation bonding technologies, focusing on both exceptional performance and environmental sustainability. By adhering to rigorous quality control standards, ALTECO ensures that every product leaving the factory meets the highest international benchmarks, which has allowed the company to successfully export its products to markets all over the world.

To provide comprehensive sales and technical support across Japan, the company maintains strategic branch offices in major metropolitan areas, specifically Chiyoda Ward in Tokyo and Naka Ward in Nagoya, alongside its Osaka headquarters. Moreover, ALTECO maintains a strong commitment to Corporate Social Responsibility (CSR), actively participating in environmental conservation efforts and ensuring the safe, responsible management of chemical substances. Moving forward, ALTECO INC. remains deeply committed to connecting materials and people through the power of advanced adhesive technology, driving forward global manufacturing capabilities, and contributing significantly to industrial advancement worldwide.
