

LaLaLand Education

Company Description

LaLaLand Education Co., Ltd. is an educational and social welfare organization headquartered in Yokosuka City, Kanagawa Prefecture, Japan. Established in 2018, the company operates under a clear, inspiring mission: "Through childcare and education, we strive to make the world a better place by creating environments where children can develop their own will and fully immerse themselves in their passions."

The company's operations center around two core business divisions. The first is the Global Education Division, which manages international schools such as Yokosuka Bilingual School and provides comprehensive English language education programs. By creating immersive, cross-cultural learning environments, LaLaLand Education encourages young learners to acquire natural language abilities while developing global perspectives, independent thinking, and strong communication skills.

The second core area is the Special Needs and Child Developmental Support Division, operated under the brand name "Atelier Gift." This division provides tailored child development support and after-school day services for children with special needs. Atelier Gift focuses on custom-designed developmental programs that respect each child's unique pace, strengths, and goals. Through specialized therapy and interactive creative activities, the dedicated staff help children build confidence, social abilities, and independence in daily life.

A defining strength of LaLaLand Education lies in its ability to combine high-quality bilingual education with specialized developmental therapy. By promoting an inclusive atmosphere where diversity is valued and every child's personality is celebrated, the company creates a unique educational model. Supported by a passionate staff of around 70 professionals, LaLaLand Education continues to expand its positive educational impact, dedicated to unlocking the unlimited potential of every child in the community.
