

HAWE Hydraulik SE

Company Description

About HAWE Japan

Established in July 2007 and headquartered in Nagoya, Aichi Prefecture, HAWE Japan Co., Ltd. serves as the official Japanese subsidiary of HAWE Hydraulik SE, a world-renowned German manufacturer of high-quality hydraulic components and systems. The Japanese branch is dedicated to the manufacturing, assembly, sales, repair, and promotional activities of hydraulic equipment and its related parts. HAWE Japan also provides comprehensive technical support and after-sales service to domestic clients across various industries, ensuring the reliable performance of their machinery.

Global Heritage and Expertise

Founded in 1949, the parent company, HAWE Hydraulik SE, operates on the guiding principle of providing "Solutions for a World under Pressure." With its global headquarters located in Aschheim, near Munich, Germany, the HAWE Group boasts a workforce of approximately 2,900 employees globally. It operates 45 facilities across 24 countries and maintains a robust sales and partner network spanning over 40 countries. The company distinguishes itself through its modular design approach, delivering highly compact, energy-efficient, and exceptionally durable hydraulic solutions tailored for high, medium, and low-pressure applications.

Diverse Industrial Applications

HAWE's cutting-edge hydraulic solutions are highly trusted in Japan and around the globe. Our products are widely utilized across a diverse range of sectors, including machine tools, construction machinery, mobile equipment, and agricultural machinery. Furthermore, our precision technology plays a vital role in medical technology (such as surgical tables and dental chairs) and renewable energy systems, particularly in wind turbines and solar power plants. Our zero-leakage seated valves and high-pressure technologies directly contribute to enhancing machine performance while significantly reducing energy consumption.

Commitment to Sustainability and Work-Life Balance

HAWE Hydraulik is deeply committed to addressing global challenges such as climate change and demographic shifts. Both the global headquarters and HAWE Japan have achieved carbon neutrality, continuously contributing to a sustainable economy through energy-efficient machines and electrification solutions. Inheriting the progressive corporate culture of its German parent, HAWE Japan places a strong emphasis on the work-life balance of its employees. Offering an exceptional working environment with over 130 annual days off and extremely low average monthly overtime, the company ensures that its team members can thrive both professionally and personally while contributing to the advancement of sustainable industrial infrastructure.

Company Details

Head Office

Japan

Main Business

油圧機器およびその部品の製造、組立、修理、販売ならびに宣伝。電動式自走車、車輛用・産業用蓄電池の修理、販売。およびそれに付帯関連する一切の業務。（※グローバルでは、高圧・中圧・低圧用途向けの高品質な油圧システム、電子制御機器、ソフトウェアの開発・製造を展開しています）
