

sevensix

sevensix Inc.

Company Description

Sevensix Inc., established in April 2007, is a highly specialized group of optical technology professionals headquartered in Roppongi, Tokyo. Operating under the corporate philosophy of "think next," the company continuously anticipates future industry trends, striving to provide innovative value and comprehensive support to society through the unique perspective of "light."

The company initially began its journey as a specialized trading firm, importing and selling exceptional optoelectronics products from around the world. Their extensive product portfolio includes laser sources, optical communication components, semiconductors, RF devices, and bio-related equipment. However, Sevensix did not stop at simply distributing hardware. By deeply understanding their clients' needs and market potential, they have successfully transitioned into a solutions provider, offering everything from standalone components to fully integrated systems and custom applications.

Driven by a relentless pursuit of technological excellence, Sevensix evolved beyond its trading roots to establish its own research and development division. Today, the company proudly operates as a manufacturer, developing original optical and electronic equipment. They actively engage in joint research with academic institutions, such as Saitama University, bridging the gap between cutting-edge academic research and practical industrial application. Their strong relationships with manufacturing partners allow their engineers to receive hands-on training directly at factory sites, fostering a profound technical expertise that sets them apart from competitors.

Sevensix also places a strong emphasis on cultivating an empowering corporate culture. They encourage their employees to take calculated risks over complacency, supporting ambitious challenges such as establishing an overseas subsidiary in Vietnam. Ultimately, Sevensix aims to be a true industry leader and a bridge that showcases Japan's most advanced scientific achievements to the global market, continuously delivering total solutions and unprecedented value.

Company Details

Head Office

Japan

Main Business

レーザー関連（レーザー光源、計測、センサシステム、光学部品・光学材料、光周辺機器、真空部品）、光通信関連（光コンポーネント、計測・測定機器/ファイバ加工設備機器、アクセサリ）、半導体関連、RF関連、バイオ関連等の国内外の優れたオプトエレクトロニクスの輸出入販売、光・電子機器の研究・開発・販売、光・RF関連中古品のインターネット販売。

President

羽根 洋介

Established

2007年
