HTL Co. Japan Ltd.

Company Description

HTL Co. Japan Ltd., established in December 1994, is a technology trading company providing a wide range of advanced products and services, centered on semiconductor and flat-panel display (FPD) manufacturing equipment. We handle the sales of inspection, repair, and atomic layer deposition (ALD) systems, while also offering additive manufacturing solutions, including metal 3D printers and related metal powders and advanced materials. Through these businesses, we support the advancement of production technologies and the optimization of manufacturing processes in sectors such as semiconductors and electronic components.

Beyond equipment and materials sales, we offer comprehensive services—including post-installation maintenance and technical support—to ensure seamless equipment operations for our clients. Furthermore, we develop software and provide system integration solutions in technical domains such as embedded control, image processing, artificial intelligence (AI), and the Internet of Things (IoT), meeting clients' technical needs from both hardware and software perspectives. We are also expanding into emerging fields utilizing cutting-edge technologies, such as nanosatellite equipment.

Placing strong emphasis on collaboration with both domestic and overseas manufacturers, we introduce advanced products and technologies to Japanese and global markets while contributing to solving client challenges through broad technical support. In specialized fields such as semiconductors, electronics, and additive manufacturing, we deliver end-to-end support—from product selection and implementation to operational assistance—driving innovation and strengthening competitiveness across the manufacturing industry.

Company Details

Head Office
Japan

Main Business
半導体・FPD製造装置の販売 / 金属3Dプリンター・関連材料の販売 / 先端技術機器の販売 / 装置の保守・技術サポート / ソフトウェア開発・システムインテグレーション

President
アチャリヤ　アチンティヤ

Established
1994年12月15日

Capital
9,800万円

Number of Employees
101 - 500
