Azabu Beauty Clinic

Company Description

Azabu Beauty Clinic, operated by the Sobikai Medical Corporation, is a leading aesthetic dermatology clinic located in Roppongi, Minato-ku, Tokyo, specializing in non-surgical facial injectables and advanced skincare treatments.

The clinic operates under a strong medical philosophy focused on achieving a elegant and "natural look." Rather than performing excessive or unnatural cosmetic alterations, Azabu Beauty Clinic prioritizes subtle, precise, and evidence-based enhancements that bring out each patient's inherent beauty and confidence without resorting to surgical procedures.

The medical team consists exclusively of doctors with more than 10 years of clinical experience. Many of these physicians serve as international clinical trainers and faculty members, delivering high-precision treatments while advancing global medical standards. The clinic specializes in advanced hyaluronic acid and Botox injections, human collagen therapy, and cutting-edge energy-based devices such as HIFU and XERF for non-surgical face-lifting and rejuvenation.

In addition to injectable treatments, the clinic offers customized skincare programs driven by detailed skin analysis technology. Patients receive tailored treatment plans designed to address specific concerns, including pigmentation, sagging, fine lines, and overall skin texture. Flat-rate laser treatment programs and skin-nourishing "skin-breeding" injectable therapies help establish a healthy cutaneous foundation for long-term skin health. A dedicated men's aesthetics lineup is also available to meet diverse demographics.

With an emphasis on post-treatment care, clear pricing structures, and complimentary first-time consultations, Azabu Beauty Clinic ensures a safe, transparent, and patient-centered environment. This dedication to quality medical care and continuous technical refinement is reflected in its impressive 90% patient retention rate. Embracing the vision of sharing world-class aesthetic techniques with the world, the clinic remains a trusted partner in graceful aging and skin restoration.
