Amentum Design and Facility Management

Company Description

Amentum Design and Facility Management is an American architecture and engineering firm established in Tokyo in 1955. Over the years, Amentum Design and Facility Management has evolved into one of the most progressive providers of both Architectural Design and Facility Services in Japan. By combining contemporary global best practices and methodologies with the deep understanding of Japan and many other countries that we have gained for more than 6 decades, Amentum Design and Facility Management is uniquely qualified to successfully serve both Japanese and foreign companies operating in Japan and elsewhere. Amentum Design and Facility Management 's value adding approach to our work focuses on our ability to thoroughly understand our clients' needs and then tailor our wide variety of expertise and service in response.

Today, Amentum Design and Facility Management employs more than 20,000 people worldwide in over 60 countries, including Antarctica. In addition to A/E services, Amentum Design and Facility Management Japan also provides Operation & Maintenance and Facility Management services. Our customer base includes Government, US Department of Defense (US Military), and Commercial clients.
