Job Description

『IT Engineer/Software Engineer』

Many projects in advanced technology areas such as full flex x remote / PWA!
 Establishment in 1998, for customers in various industries
 Our company has been engaged in system consulting and system development,
 Became a group company of a company listed on the First Section of the Tokyo Stock Exchange in 2019.
 Opportunities to be deeply involved in the field of advanced technology are increasing more and more.

CEO of this company comes from Full-Stack Engineering background.
 So, this company focus on providing a good work environment for engineer and supporting career advancement.

In this position, from the development of Web services to the development of business applications using new technologies,
 we will entrust you with the work from basic design to implementation in the front-end or back-end development work in the
 advanced technology area according to your intentions.

■Job description

In a system development project using the front-end, back-end, and cloud, we will entrust the following processes according
 to experience and your intentions.

Depending on your skills we will ask for design, construction, development, testing, operation, maintenance, etc.

■Required skills and experience

- Conversational Japanese (Interview will be held in Japanese)
- 3+ years of engineering experience for System development using any of the following programming languages.

【Programming language】

front-end : React/Typescript/Node.js/HTML/CSS/Javascript

back-end : Java/PHP/C/Python/Go/Haskell

could : AWS/GCP/Azure

■Working Hours and Location

flexible work arrangements

working hour:8 hours

work remotely is OK

※If you need to go to the office to work,

You can work at either the Yokohama headquarters or the Tokyo office.

Benefits:

- ・ Visa Support
- ・ Company Health Insurance and Pension
- ・ Transportation Allowance
- ・ Yearly Raise
- ・ Various training system
- ・ qualification reward (There is a program that pays rewards for qualifications acquisitions)

Holidays:

- ・ 2 days off a week (Saturday and Sunday)
- ・ Golden Week, Summer and Winter Holidays

■Providing a less stressed environment as much as possible

This company focuses on providing a good work environment for engineer and supporting career advancement.

One of the features of our company is that we have created an environment where we do not feel stressed. The memory of
 the development standard PC is at least 16GB. We will prepare the environment by giving priority to the specifications
 required by each engineer. It is an environment where you can use it flexibly if you have a Mac, dual monitors, and other
 necessary software and tools. We believe that maximizing quality and productivity is important for engineers.

■Full flex x remote work-based flexible work style is possible

Since we have promoted remote work regardless of coronavirus, we plan to continue to promote the environment even after
 the end of the corona situation.

Please apply if you would like to know more about this company!

Required Skills

- 3+ years of engineering experience
- Java, C#
