Job Description

Working environment with good life/work balance in a comfortable office environment rich in nature

Company Description

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. Despite employing over 16,000 people worldwide, we have remained a family company, and are proud of our close-knit working environment. There are always two sides to working with us - the professional and the personal. Together

they add up to a more rewarding career, day in and day out.

Project Engineer provides technical support for Endress+Hauser LNG Tank Gauge solutions, and other third party gauges and components that is part of the complete LNG tank gauging solution provided to the sales office globally, representatives and customers.

Summary

Project Engineer provides the support on technical evaluation and technical proposal at acquisition stage, and is responsible for engineering of LNG Tank gauging system cabinet, documentation, performing FAT/iFAT, and providing after delivery service support during project execution stage.

The position is also required to provide service training program to sales office and customers.

Job Description

- To provide support in reviewing customer tender specification and customer requirements for BDMS (Business Development Managers) and Sales Center to create technical and commercial proposal
- To create system and network design including communication with DCS
- To select adequate system devices used in the customer/project specific system cabinet
- To visit customer for acquisition support and technical discussion and clarification
- To provide step by step technical assistance in analyzing and identifying the problems and work procedure to solve issues during start up, commissioning and the complete service cycle of the solution supplied to the customer.
- Coordinate root cause analysis report with Quality management and RND department.
- Creates project documentation such as functional design specification(FDS), communication table, and inspection/commissioning procedure.
- Support our quality and complaint management team to work on continuous improvement of our services and products. Actively participates in quality improvement process to ensure operational excellence.
- To conduct FAT/iFAT
- To perform start up site commissioning

Career Path

Global career opportunities within the Endress+Hauser Group through the internal recruitment system. We provide full OJT training, and you can take part in our E-learning to learn new skills, from broad subjects to specific topics related to your area of expertise.
