## Job Description

- Crafting solutions leveraging various technological domains, encompassing cloud and server infrastructure, and potentially other areas.
- Serving as a strategic IT business partner, finding solutions for complex technical issues and reporting project progress to senior management.
- Defining and maintaining region-wide IT infrastructure guidelines and standard operating procedures.
- Designing and implementing strategies for public cloud environments, such as Azure or AWS.

- Leading the APAC shared service team, site helpdesk, and local IT contacts to ensure optimal performance of enterprise network, server, storage environments, and existing cloud infrastructure.
- Analyzing and evaluating technical issues, conducting tests, maintaining, modifying, integrating, and monitoring technical infrastructures.
- Collaborating with business partners and regional IT leaders to align with strategic infrastructure goals.
- Initiating proof-of-concept and implementation activities from an architectural standpoint.

## Required Skills

### Technical Skills:

- Proficiency in hands-on enterprise network and server storage management.
- In-depth understanding of Cisco & Aruba network architecture.
- Deep knowledge of VMWare virtualization design and operation.
- Extensive grasp of Azure and AWS cloud design and operation, with the ability to integrate various laaS or PaaS services into specific business applications.
- Strong comprehension of enterprise Disaster Recovery Plans (DRP).
- Familiarity with Japan's local information security regulations and standards.

### Soft Skills:

- Customer-oriented approach, integrating the needs of internal and external clients in alignment with company interests
- Effective team leadership and collaboration, promoting information sharing and team cohesion for collective efficiency.
- · Innovation and creativity, actively contributing to innovation projects regardless of responsibility level.
- · Proficiency in project management and ITIL processes.

### Required Experience:

- Minimum of 8 years of experience managing or leading infrastructure technology, including network, server, and one or more public clouds.
- · At least 3 years of experience in a global organizational setting.
- Experience in setting up infrastructure for mid-large scale enterprises (0-1 setup).
- Practical knowledge of mid-large scale workload migration to cloud environments.
- Strong vendor and supplier relationship management within the region.
- · Delivery-focused mindset for expedited time-to-market solutions.

## Company Description
