Job Description

Position Overview:

We are seeking a dedicated and knowledgeable Environmental Health and Safety (EHS) Specialist to join our team at our state-of-the-art data center facility. The EHS Specialist will play a crucial role in ensuring the safety, health, and environmental compliance of our data center operations. This position requires a strong commitment to maintaining a safe work environment, mitigating environmental risks, and promoting best practices in EHS.

Key Responsibilities:

1. **Safety Compliance:** Ensure compliance with all applicable local, state, and federal safety regulations, codes, and standards within the data center.
2. **Risk Assessment:** Identify potential safety hazards and environmental risks within the facility and develop strategies

to mitigate these risks.

3. **Training and Education:** Provide EHS training and awareness programs for data center employees, contractors, and visitors. Ensure that personnel are well-informed about safety protocols.
 4. **Incident Investigation:** Lead and conduct investigations into incidents, accidents, or near misses. Develop corrective actions to prevent recurrence and maintain accurate incident records.
 5. **Emergency Preparedness:** Develop and maintain emergency response plans, conduct drills, and ensure that the facility is adequately prepared for various emergency scenarios.
 6. **Environmental Compliance:** Monitor and manage environmental compliance, including waste disposal, emissions, and chemical handling, in accordance with local, state, and federal regulations.
 7. **Safety Inspections:** Conduct regular safety inspections and audits of the data center facility to identify and address potential safety and environmental issues.
 8. **Documentation:** Maintain accurate records of safety and environmental activities, including incident reports, inspection findings, and training records.
 9. **Ergonomics and Health:** Promote employee health and well-being by addressing ergonomic concerns and implementing wellness programs as necessary.
 10. **Continuous Improvement:** Stay up-to-date with industry trends and regulations, and recommend improvements to EHS policies and procedures.
-

Required Skills

Qualifications:

- Bachelor's degree in Environmental Health and Safety, Occupational Health and Safety, or a related field. Relevant certifications (e.g., CSP, CIH, CHMM) are a plus.
 - Minimum of 3 years of experience in EHS roles, with specific experience in data center environments preferred but not required.
 - In-depth knowledge of safety regulations (OSHA, EPA, etc.) and best practices.
 - Strong communication and interpersonal skills, with the ability to engage and educate employees at all levels.
 - Excellent problem-solving skills and the ability to make sound decisions under pressure.
 - Proficiency in using EHS management software and tools.
 - Demonstrated commitment to promoting a culture of safety and environmental responsibility.
