Job Description

We provide general services such as consulting, design construction, migration, and operation when migrating from a customer's on-premises environment to a cloud environment. In post-cloud environments, we leverage the power of cognitive automation tools to build and deliver highly efficient integrated operations services that span business processes and IT infrastructure.

Required Skills

Operation experience in public cloud (AWS/Azure, etc.) or on-premises

Operation skill for Cisco Router/Switch, ASA

Operation skill for SSH Client, remote operating network

Understanding of IP networks, including the concepts of routing, switching, and addressing -

Experience in operating or implementing firewalls, WANs, and VPNs

Experience in cloud migration from an on-premises environment

Experience in designing, building, and operating public clouds/hybrid clouds
