Job Description

This company provides an all-in-one service, from market analysis to strategy design, development of marketing measures, and effectiveness measurement, based on insights extracted from purchasing data with annual sales of 10 trillion yen.

■About the Position/POSITION SUMMARY We are working with major retail clients who are utilizing our data, which has the world's largest purchase history (ID-POS) data. We will support you in improving your business performance. In addition to preliminary analysis, targeting settings, effectiveness verification, and improvement proposals for the sales promotion and advertising services that we provide, we may also carry out activities that fall into the consulting field. You will work with the sales team to build data-driven stories and proposals that will persuade clients. Analysts may also accompany you to business negotiations and give presentations. At the same time, we will be promoting improvement activities within the team, such as streamlining these activities, and deepening collaborative activities with sales representatives.

■Business details/DUTIES AND RESPONSIBILITIES

- Provide preliminary analysis, targeting settings, effectiveness verification, and improvement proposals for promotional measures provided based on data
- Support activities that fall into the consulting field.
- Process data using various methods to accomplish the clients set goal (this can be simple aggregation or statistical models, etc.)

[Work environment] Language: Mainly Python

Rental device: Windows Laptop

Required Skills
