Job Description

We are seeking a talented and experienced bilingual Software Developer proficient in both Japanese and English languages. The ideal candidate should possess strong technical skills in C/C++ and Dot Net, coupled with hands-on experience in Cloud Technologies such as AWS and Azure.

Key Responsibilities:
1. Develop, test, and maintain software applications in C/C++ and Dot Net.
2. Collaborate with cross-functional teams to design and implement software solutions.
3. Utilize Cloud Technologies (AWS/Azure) to optimize and enhance software performance.
4. Ensure the software meets high-quality standards through manual and automated testing.

5. Work closely with clients and stakeholders to understand project requirements and specifications.
6. Troubleshoot, debug and resolve software issues promptly.
7. Keep abreast of industry trends and emerging technologies to contribute innovative ideas.

Required Skills

Language Skills:
- Fluency in Japanese and English (both written and verbal) is mandatory.
- Ability to effectively communicate technical concepts in both languages.

Technical Skills:
- Proficient in C/C++ and Dot Net programming languages.
- Hands-on experience with Cloud Technologies, particularly AWS and Azure.

Experience:
- 4 to 10 years of experience in software development.
- Proven track record of successfully delivering software projects.

Testing Experience:
- Experience in both manual and automated testing is a strong advantage.
- Ability to identify and implement effective testing strategies.
