Job Description

About the Company:

We are currently seeking a Senior Software Engineer to join one of our client's teams, a company that is a leader in the Medical Big Data domain. Their mission is to revolutionize healthcare by utilizing big data to create impactful solutions for both consumers and medical institutions.
They have an extremely strong and growing reputation, have a friendly team of passionate and talented developers where you can grow and expand your skills.

Why You Should Apply:

• The company offers great opportunities for employees to build their careers growth
• Gain extensive experience, from launching a product to designing, implementing to releasing
• Flexible working hours (core hours: 11:00-15:00)
• Assistance programs for technical book purchases and engineering event participation
• Continuous learning and growth opportunities in a supportive work culture.

Required Skills

Ideally, you have:

- 3 years' experience in API development using statically typed languages (GO language preferred)
- Knowledge of basic algorithms, computational complexity, hardware, and development processes.
- Practical experience in development and operation using cloud infrastructure such as AWS or GCP.
- Experience as an Engineering Manager (EM) and/or Tech Lead.
- Familiarity with authentication, authorization, and access control, including OAuth and OIDC.

Welcomed Skills:

- Proficiency in building and managing infrastructure environments using tools such as Terraform or Ansible.
- Experience in designing and implementing service-wide monitoring using system monitoring design tools such a CloudWatch or Datadog.
- Practical experience in security measures for web applications and infrastructure environments.
