Job Description

Summary:

We are seeking a highly motivated and experienced **Embedded Software Engineer** to join our **automotive embedded software** team. You will develop embedded software for in-vehicle communication protocols, ensuring seamless audio control integration within automotive networks.

Key Responsibilities:

- Gather and analyze customer requirements in early development stages.
- Design, implement, and debug embedded software.
- Collaborate with cross-functional teams (core development, QA, etc.).
- Conduct code reviews and ensure compliance with product definitions.
- Analyze technical challenges and propose effective solutions.
- · Communicate effectively with customers and global BOSE teams.
- Manage the full software development lifecycle (requirement, design, implementation, testing).

Required Skills

Required Experience & Skills:

- Strong programming skills in C/C++.
- Experience with embedded RTOS (Vector OSEK/VDX, AUTOSAR).
- Familiarity with CAN communication software development.
- Proficiency in static/dynamic code analysis.
- Hands-on experience with lab equipment (oscilloscopes, protocol loggers, etc.).
 Knowledge of configuration management tools (e.g., Subversion, JIRA).

- Ability to read schematics and data sheets for peripheral components.
 Excellent documentation, communication, and problem-solving skills.
- Fluency in English and Japanese.
- Strong time management and ability to work independently.
