## Job Description

## Company Profile

A US headquartered specialist clothing and apparel company are currently undergoing a major tech-transformation and are looking for an SAP technical consultant to lead their migration away from their existing ERP system.

## The Role

You will be driving the migration of a legacy ERP system, which has been used since the company's launch in Japan more than 20 years ago, ensuring a smooth transition to their global SAP system, in particular working on SCM, FI/CO, MM modules. Once the implementation is complete, there will be more long-term product management type tasks - upgrades, development, maintenance, etc. - so this will be a key role in the company for the foreseeable future.

## Your Skills

- Fluent Japanese and business level English are a must for this role due to internal communication and calls with global teams.
- Someone with a strong ERP implementation background (SAP / Oracle) will be needed for this role - we're looking for more of a hands-on consultant, rather than a pure project manager, as your knowledge will be used to challenge and manage vendors.
- Any exposure to the retail sector is a plus, though not mandatory.

## Location

Tokyo 23 wards

## Salary

11M - 13.5M JPY

## Selling Points

- Drive a major technical transformation in the Japan business, which will affect around 700 users.
- Be regarded as the company's technical subject matter expert regarding SAP, working with senior internal stakeholders and managing external vendors.
- Work for a major US retail company, with a well-recognized and popular brand.

Reference Number: 06940-0012953971
