Job Description

BiOS is looking for data center engineers to join international support team servicing a global provider in Hyogo prefecture. Fast Moving environment where you will be expected to undertake key aspects of maintenance and deployment work on Servers, network appliance, cabling and datacenter projects.

- Coordinate, operate and monitor all data center operation and main equipment room related activities to ensure operational stability at all times.
- Physical network support. (e.g. voice, network, circuit) including cable management (including heartbeat, HBA, SAN fabric) .
- Hardware deployment, support, supervision & installation. (e.g. construction work, cabling, power, rack/un-rack, server kitting, diagnostic, OS build and support).
- Site logistics support (e.g. receiving, relocation, shipping and disposal of equipment) including power downs.
- Stock management. (e.g. spare parts, cable, kits) .
- Asset Management - asset updating, tracking, gap analysis, reconciliation and remediation to ensure the data is always accurate using specified tools.
- Capacity management and forecasting. (e.g. space, power, cooling, ports).

- Security Management - manage the physical security of the site in cooperation with building security, and Investigation Services. (e.g. access control, entitlement reviews).
- Request Management – process tickets as per agreed service levels.
- Continuity of Business preparation and support – including power-down, COB drills.
- Keep and produce accurate evidence of daily activities as required for control testing, audit, inspection and other purposes.
- Contribute to project and program activities as necessary.
- Handover during shifts, training of new staff.
- Coordinate with suppliers, system administrators, clients and other groups as necessary.
- Document and maintain updated processes/manuals in English/Japanese.
- Comply and enforce internal policies, processes and standards.

Required Skills

Required skills:

- Technical skills and excellent knowledge of server or connectivity devices hardware
- Comfortable in a hands-on role.
- Physically able to lift 70 lbs. (30kg) with proper technique.
- Ability to work with hands (will work with power drills, hand tools, and precision tools).
- Willing to take direction and follow well defined processes and procedures.
- Can work well both as an individual and as part of a team.

Bonus Points:

- 1+ years' experience working for a data center or equivalent.
- Detail-oriented with excellent organizational skills.

Requires Languages:

- English: Business level
- Japanese: Business level
