### Job Description

**Overview:**

The software QA engineer is in charge of our cloud based application and contributes to improvement of the quality through the planning, executing and reviewing from the wider view.

**Key Responsibilities:**

- Define the completion criteria of the change in the requirement defining steps

- Collaboration with application developers to define the appropriate test plan
- Creation and execution of detail test plan (e.g. regression, data consistency, response speed, high workload)
- Detail analysis of each test result and statistical analysis of qualitative issue
- Architecture management of auto test environment and improvement planning
- Visualization of test result and explanation.

**Requirements:**

- Bachelor's degree in IT or equivalent applied experience
- 1+ years of application development (Java, JavaScript, SQL, python)
- 3+ years of quality assurance testing experience
- Experience of build or use of testing automation tools (autify, Jenkins, postman, selenium, appium)
