Job Description

1) About the company

We are currently seeking a talented **Back End Engineer** to join a dynamic team working on innovative projects for clients across various industries such as IT, manufacturing, finance, and services.

Our client provides a highly collaborative environment that encourages the use of cutting-edge technology. You will have the opportunity to develop impactful applications that power e-commerce platforms, management systems, and more.

2) Who are you

- You are an experienced web and/or mobile application developer.
- You are passionate about back-end development and enjoy working with a variety of programming languages.
- You thrive in a team environment and are excited about the opportunity to contribute to projects in diverse industries.

3) Why should you apply

- Opportunity to work on large-scale projects in industries like e-commerce, retail, and manufacturing.
 - Flexible work environment with chances to work on innovative technologies like AWS, Google Cloud Platform, and more.
 - Chance to work with a diverse team of professionals, including opportunities to hone your skills in Japanese and English.
-

Required Skills

4) Requirements

- **At least 2 year of experience** in developing web and mobile applications using languages such as **Go-Lang, Java, C#, JavaScript, React.js, TypeScript, PHP, Python, etc.**
- Basic knowledge of DBMS (Database Management Systems).
- Graduate in a science-related major (e.g., Informatics, Statistics, Mathematics).
- Japanese language ability above daily conversational level (JLPT N3 or higher).
- Business-level English or higher.

5) Desired skills

- Experience working with cloud platforms like AWS, Google Cloud Platform, Azure, etc.
 - Experience in creating technical documentation in Japanese.
-
