Job Description

We at CareerCross are seeking a **DevOps Engineer** to join our team and take on the exciting challenge of building and maintaining complex, high performance systems.

Responsibilities

- Maintaining and improving AWS infrastructure, and code pipelines on GitHub
- Maintaining and improving Cloudflare infrastructure
- Tracing and troubleshooting issues from browser to back-end
- Maintaining and troubleshooting Ubuntu and AWS Linux configuration issues
- Maintaining and improving Docker based local development environments
- Performing system updates, and other daily maintenance tasks

Essential Skills

- Experience maintaining a Linux based web stack (Linux, Apache or Nginx, MySQL)
- Experience with basic AWS technologies/concepts (VPC, IAM, EC2, ELB)
- Experience maintaining/building code pipelines

- Experience maintaining a Linux PC
- Experience running docker containers
- Working in a primarily English environment
- Strong sense of curiosity and willingness to learn new technologies/practices
- Responsible habits when dealing with sensitive environments
- Ability to work both alone and as a team when needed

Desired skills

- Experience with AWS technologies like ECS, ECR, RDS, S3
- Experience with GitHub actions
- Experience with docker composer
- Experience writing Terraform code for AWS, GitHub, Cloudflare
- Ability to communicate in Japanese with business stakeholders

Team & Working Environment Team environment with members working both remotely and on-premise at the company headquarters and candidate should be flexible to work at office as well whenever its needed.

Apart from above skills, know-how of recruitment / HR industry, adding value through architecture improvements / suggestions and contribution in product delivery will be an added advantage.
