Job Description

A recruitment agency is seeking a skilled Digital Transformation Consultant or DX Consulting Manager to drive digital innovation in the healthcare sector. The role involves leading business planning, proposing advanced technology solutions, and managing the implementation of Generative AI and Machine Learning initiatives. This position requires end-to-end project management skills, including proof-of-concept development and process optimization in healthcare-related projects. The successful candidate will also play a key role in expanding the organization's digital transformation capabilities and contribute to business development in areas like sales, marketing, and quality control.

Required Skills

- 2+ years of experience in Generative AI, Machine Learning, or digital transformation projects.
- Expertise in improving business processes through advanced technologies.
- Proven track record in project management (planning, development, and implementation).
- Experience in bringing new technologies to market.

- Native-level Japanese proficiency; English skills are preferred but optional.
