#### Job Description

**Job Description:**

- **Building, maintaining, and improving stability and automation** for the company's internal cloud Kubernetes container platform and service mesh
- **Stable operations and migration of existing services** (legacy Kubernetes platform, Mesos/Marathon platform) to the internal cloud

This position offers a dynamic environment for growth and development through continuous new challenges and is part of a department expected to take a leadership role across the entire organization.

In this role, you will be responsible for project management, product management, accounting, and other non-engineering tasks related to services within the Container Platform Group.

Key Responsibilities:

### 1. Task, Project, and Product Management

- Develop project plans, manage progress, and oversee risk management for each task and project
- Formulate medium- to long-term project plans for each product
- Support release operations and obtain necessary approvals
- Coordinate with other departments and internal clients
- Manage product backlogs
- Oversee general tasks required for product maintenance and growth
- Report to senior management on projects and products

### 2. Accounting & Server Resource Allocation

- **(Monthly) Billing Report:** Generate usage reports for each service to invoice users and investigate usage inquiries if needed
- **(Monthly) Server Resource Adjustment:** Summarize user demand forecasts and calculate required server numbers
- **(On Demand) Server Resource Allocation:** Allocate procured servers to users based on priority
- **(Monthly) Sales & Cost Analysis:** Generate KPI reports on revenue, costs, and profits for each service
- **(Yearly) Budget Planning:** Support budget planning based on user forecasts and group plans
- **(On Demand) Sales/Cost Simulation:** Analyze and simulate sales and costs when launching new services/products

### 3. General Non-Engineering Tasks

- Respond to user inquiries
- Manage user surveys
- Manage daily engineering tasks (assign priorities, assign tasks, track progress)
- Handle other non-engineering tasks

---

## Required Skills

Required Technology Stacks:

- **Programming and Scripting:** Python, Shell scripting
- **Cloud Platforms:** GCP, AWS, Azure
- **Container Platforms:** Kubernetes, Docker
- **Data Management:** SQL
- **Data Analysis & Visualization:** Excel (SumIFS, XLOOKUP, Pivot tables), PowerPoint for presentations
- **Project Management:** Agile methodologies (Scrum, Kanban), SDLC understanding
- **Networking and Linux:** Experience with web, cloud, and Linux-based systems
- **Monitoring & Automation:** Experience with automation and container orchestration

**Desired Skills:**

- Familiarity with service mesh concepts and tools (e.g., Istio)
- Experience in budget planning and financial reporting
- Proficiency in English (TOEIC score 800+ or equivalent) and Japanese is a plus
