Job Description

Who are we?
An international global System Integrator with 25+ years crafting innovative AI solutions. 6200+ employees in their combined offices of 10 around the globe, and still counting! Dedicated to delivering results quickly, efficiently, and at scale by combining the best human expertise with the power of Artificial Intelligence through their own hyper digital AI platform.

In Japan, we are partnered with world-leading services including our own platform (now being displayed in Times Square), application creation/modernization, cloud services, customer experience & DXP, data & analytics, digital product design & development, and digital strategy & innovation to ensure a stable business model.

Who are you?
As a Business Analyst/System Bridge Engineer, you will collaborate closely with top clients in Japan, and your responsibilities include:

Gathering requirements from stakeholders.
Organizing requirements.
Translating and simplifying requirements as necessary.
Managing and communicating requirements effectively.
Analyzing requirements.
Addressing engineers' questions regarding requirements.
Establishing acceptance criteria for each requirement in web digital solutions.
Assisting QA Engineers in validating the digital solution's expected outcomes and participating in the validation and acceptance phase of digital product development, supporting customers throughout the process.

Why should you apply?
International work environment, chance to use English with global clients.
Comprehensive Support: We recognise our employees achievements that drive long-term success.
Remote-friendly - work from home, only at the office when needed!

Required Skills

Requirements

- At least 3 years of experience as a Business Analyst/ Systems Bridge Engineer.
- Native/ near-native proficiency in Japanese for business (written and spoken).
- Advanced level of English proficiency.
- Excellent communication and interpersonal skills.
- Demonstrated analytical expertise.
- Proficiency in MS Word and Excel.
- Experience in documenting system/software requirements.
- Self-starter with strong self-organizational abilities.
- Openness to learning and continuous improvement.
- A Tokyo resident with citizenship/valid visa.

Good to have

- Knowledge in Agile / Scrum.
- Experience on Web Application development projects.
