## Job Description

**Responsibilities:**

- **Product Development**: Lead the development of SaaS applications leveraging **Generative AI**, **large-scale language models (LLMs)**, and complex API integrations.
- **Web Application Development**: Build and maintain web applications with **TypeScript**, **React**, and **Next.js** for front-end, and **Python** for back-end, with a focus on scalability, performance, and maintainability.
- **API Design & Integration**: Design, implement, and integrate APIs, and contribute to projects that generate new APIs.
- **Collaboration**: Work with machine learning engineers, product managers, and quality assurance teams to deliver effective solutions.
- **Continuous Improvement**: Contribute to process improvements and strategic initiatives to enhance engineering productivity, code quality, and team happiness.

Required Skills

**Required Skills:**

- **3+ years** of experience in developing and maintaining **user-facing web applications**.
- Strong coding skills in **JavaScript/TypeScript**, with familiarity in other OOP languages such as **Python** or **Java**.
- Experience with **ReactJS**, **Next.js**, **HTML**, and **CSS** for front-end development.
- Familiarity with back-end frameworks such as **Node.js**, **Express**, **FastAPI**, or **Django**.
- Experience with **unit and integration testing** (e.g., **Jest**, **Cypress**).
- Understanding of **relational databases** and basic database concepts.

**Nice-to-Have Skills:**

- Knowledge of **cloud technologies** (AWS, GCP, Azure) and **DevOps practices** (containerization, CI/CD).
- Experience with **API design**, **architecture best practices**, and performance optimizations.
- Understanding of **security** principles (e.g., **IAM**, **data access**, **web app vulnerabilities**).
- Interest or experience in the **AI** domain, especially working with **Generative AI** or **LLMs**.
- Proficiency in **Japanese** language is a plus.

**Development Environment:**

- **Front-end**: TypeScript, ReactJS, Next.js
- **Back-end**: Python, Node.js
- **Cloud Infrastructure**: GCP, GPU cloud services
- **Tools**: Slack, Confluence, Jira, GitHub, Google Workspace
