Job Description

- **Product Development with LLMs**: Develop and enhance products leveraging large-scale language models (LLMs) to create intelligent, cutting-edge solutions.
- **API Integration**: Lead projects involving the integration of multiple APIs and the creation of new APIs to support product functionality.
- **System Design & Implementation**: Design and implement high-performance systems with a focus on maintainability and scalability.
- **Web Application Development**: Work on the development of dynamic web applications using modern technologies such as TypeScript, Next.js, and React.

Development Environment:

- **Frontend**: TypeScript, Next.js, React
- **Backend**: Python
- **Infrastructure**: GCP, GPU Cloud Services
- **Development Tools**: Slack, Confluence, Jira, Google Workspace, GitHub
- **Working Environment**: Mac (Apple Silicon), 2 Monitors, GitHub Copilot, and in-house GPT

Attractiveness of the Position:

- **Cutting-edge Technologies**: Work with Generative AI, LLM, and other innovative technologies, continuously enhancing your technical expertise.
- **Creative Freedom**: Contribute your ideas and creativity to design and build user-centric, impactful products.
- **Career Growth**: A dynamic startup environment with plenty of opportunities for personal and professional development.
- **Team Collaboration**: Join a small, collaborative team where your contributions have a direct impact on product success.

Required Skills

- Bachelor's or Master's degree in **Computer Science**, **Artificial Intelligence**, **Machine Learning**, or a related field.
- **3+ years of experience** in web application development with modern frameworks (e.g., TypeScript, Next.js, React).
- **2+ years of experience** in server-side implementation, preferably with **Python**.
- Experience with **cloud services** (AWS, GCP, Azure) and familiarity with **container technologies** (Docker, Kubernetes).
- **Fluent in English or Japanese** (business proficiency required).

Preferred Skills & Experience:

- Experience developing **SaaS web applications**.
- Proven ability to design and build **large-scale, complex architectures**.
- Basic understanding or interest in **Generative AI**.
- Passion for staying up-to-date with the latest technology trends and contributing your knowledge to the organization.
