Job Description

- **Product Development with LLMs**: Develop and enhance products leveraging large-scale language models (LLMs) to create intelligent, cutting-edge solutions.
- API Integration: Lead projects involving the integration of multiple APIs and the creation of new APIs to support
 product functionality.
- System Design & Implementation: Design and implement high-performance systems with a focus on maintainability and scalability.
- Web Application Development: Work on the development of dynamic web applications using modern technologies such as TypeScript, Next.js, and React.

Development Environment:

- Frontend: TypeScript, Next.js, React
- Backend: Python
- Infrastructure: GCP, GPU Cloud Services
- Development Tools: Slack, Confluence, Jira, Google Workspace, GitHub
- Working Environment: Mac (Apple Silicon), 2 Monitors, GitHub Copilot, and in-house GPT

Attractiveness of the Position:

- Cutting-edge Technologies: Work with Generative AI, LLM, and other innovative technologies, continuously enhancing your technical expertise.
- Creative Freedom: Contribute your ideas and creativity to design and build user-centric, impactful products.
- Career Growth: A dynamic startup environment with plenty of opportunities for personal and professional development.
- Team Collaboration: Join a small, collaborative team where your contributions have a direct impact on product success

Required Skills

- Bachelor's or Master's degree in Computer Science, Artificial Intelligence, Machine Learning, or a related field.
- 3+ years of experience in web application development with modern frameworks (e.g., TypeScript, Next.js, React).
- 2+ years of experience in server-side implementation, preferably with Python.
- Experience with cloud services (AWS, GCP, Azure) and familiarity with container technologies (Docker, Kubernetes).
- Fluent in English or Japanese (business proficiency required).

Preferred Skills & Experience:

- Experience developing SaaS web applications.
- Proven ability to design and build large-scale, complex architectures.
- · Basic understanding or interest in Generative AI.
- · Passion for staying up-to-date with the latest technology trends and contributing your knowledge to the organization.
