### Job Description

#### 1.) About the company

We are currently looking for a Data Analyst to join a HR company which specializes in assisting ordinary people in finding part-time work.

They work with 100,000+ companies and have 9 million users as of 2024. Established 8 years ago, with 1000+ employees, are looking to expand further.

In this sector, there is an increasing need for data analysts. Making it a strong and expanding career option.

They have already established a data warehouse on top of data infrastructure, creating an environment where data analysts can concentrate on their analysis.

#### 2.) Who Are you

- You are an experienced Data Analyst.
- You are a self-motivated individual that enjoys working in a team.
- You wish to create products that can contribute to solving deep-rooted issues in society.
- You are Fluent in Japanese

### 3.) Why you should apply

- Environment where management understands the importance of data, making their decisions around it.
- Work across 3 units - Product, Marketing and Business analytics - wide scope of data.
- Complete autonomy in how you want to do your work.
- Full Remote.
- Flex time System (core hours 12:00-16:00).

---

## Required Skills

### 4.) Requirements

- Experience using SQL and Python to perform analytical tasks and solve business problems.
- Ability to define problems to be solved and develop hypotheses for those problems.
- Basic knowledge of data infrastructure, DB, and DWH
- Knowledge of statistics, including estimation and testing

### 5.) Nice to have

- Experience with BI tools such as Looker, LookerStudio, Tableau, and PowerBI
- Understanding of effectiveness verification methods such as A/B testing, DID, propensity score matching, and RDD
- Experience in designing and building DB, DWH, and data marts
