Job Description

Company Introduction:
We are a leading IT solutions provider delivering comprehensive and turnkey services to Japanese companies across both domestic and international markets. Our team of bilingual engineers and managers specialize in sophisticated IT solutions spanning Enterprise Applications (SAP), JAVA, Microsoft technologies, and open-source frameworks. Our client base includes industries in Japan, the United States, the Middle East, and India, where we ensure high-quality service delivery.

We are also expanding into emerging technologies such as Blockchain, AI/ML, Analytics, IoT, and Business Process Automation. In addition, we build dedicated teams for clients using the Build/Operate/Transfer (BOT) model. As a key player in the Japanese market, we bring the latest technologies from our group companies and provide worker dispatch and paid employment placement services.

Position Overview:
We are looking for an experienced **Cobol Developer** with expertise in **life insurance system development** to join our Osaka team. In this role, you will work as part of a dedicated 7-member team, including 1 Project Manager, 2 Software Engineers, and 4 Programmers. This is a long-term project where you will contribute to the design, development, and optimization of critical life insurance systems.

Key Responsibilities:

- **Cobol Development**: Design, develop, and maintain life insurance systems using Cobol.
- **System Optimization**: Analyze and optimize existing systems for improved performance and scalability.
- **Collaboration**: Work closely with the Project Manager, Software Engineers, and Programmers to meet project milestones.
- **Problem-Solving**: Troubleshoot complex system issues and implement effective solutions.
- **Client Communication**: Regularly communicate with stakeholders to ensure project alignment and address challenges.
- **Long-Term Contribution**: Play a pivotal role in the ongoing maintenance and enhancement of systems for the duration of the project.

Required Skills

Required Qualifications:

- **Cobol expertise** with hands-on experience in **life insurance system development**.
- Proficiency in both **Japanese and English** (bilingual) to effectively communicate with stakeholders.
- Strong ability to work within a **collaborative team** environment with diverse skill sets.
- Excellent **problem-solving** skills and a **detail-oriented** approach.
- Ability to contribute effectively to long-term projects with a focus on quality and delivery.

Additional Information:

- **Team Composition**: 1 Project Manager, 2 Software Engineers, 4 Programmers.
- **Work Environment**: This is an **on-site** role, based in Osaka. **No hybrid or remote work options** are available.
- **Project Duration**: This is a **long-term** project, offering stability and growth opportunities.
